The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/567,303	<b>Applicant(s)</b> VARADACHARI, CHANDRIKA	
	<b>Examiner</b> Wayne Langel	<b>Art Unit</b> 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 1793

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Terms such as “such as”, “an appropriate degree of incomplete polymerization as characterized by its chemical properties”, “may be” and “judged by chemical tests of the solubility in organic chelates selected from citrate, DTPA or EDTA” render the scope of the claims vague and indefinite. The recitation “selected from...or” and “selected from...and” is improper Markush terminology. In claim 15, it is indefinite as to what the formula would be for the fertilizer, since the claim recites that the magnesium and ammonium may be replaced, so it is not clear as to whether any magnesium or ammonium is required to be present.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Cox or Lyons et al. Cox and Lyons et al both disclose methods for preparing mixed cation polyphosphates by heating phosphoric acid in the presence of metal oxides and potassium carbonate, followed by neutralization of the resulting liquid polyphosphate. (See col. 4, line 23 to col. 6, line 27 of Lyons et al, and col. 4, line 7 to col. 7, line 25 of Cox.) The difference between the process and product disclosed by

Art Unit: 1793

Cox and Lyons et al, and that recited in applicant's claims, is that Cox and Lyons et al do not specifically disclose that the polyphosphate should be one of iron and manganese. It would be obvious to provide a polyphosphate of iron and manganese in the process and product of Lyons et al and Cox, since Lyons et al disclose at col. 4, lines 24-34 that iron and manganese are among the multivalent metal sources which may be employed, and Cox has a similar disclosure at col. 4, lines 7-30.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne Langel whose telephone number is 571-272-1353. The examiner can normally be reached on Monday through Friday, 8 am - 3:30 pm Eastern Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
